T.E. (I.T.)

OPERATING SYSTEMS
(2008 Pattern) (Sem. - I)

Time : 3 Hours]

[Max. Marks : 100

Instructions to the candidates:

- 1) Answer three questions from Section-I and three questions from Section-II.
- 2) Answers to the Two Sections should be written In separate books.
- 3) Figures to the right indicate full marks.
- 4) Assume suitable data, if necessary.

**SECTION - I**

- Q1)** a) What is an Operating system? State and explain the basic functions of operating system. [8]
- b) State in brief key features of each of the following types of operating systems [8]
- i) Real time
 - ii) Distributed
 - iii) Parallel
 - iv) Batch

OR

- Q2)** a) Compare the following [8]
- i) System Calls & Library Functions
 - ii) Shell & Kernel
- b) Discuss various architectures of operating systems. [8]
- Q3)** a) What is thread? Define User Level Thread (ULT) and Kernel Level Thread (KLT). How is ULT mapped to KLT? [10]
- b) Explain the concept of Real Time scheduling [6]

OR

P.T.O

Q4) a) Consider the following set of processes : [10]

Processes	Arrival Time	Processing Time
P1	0	7
P2	3	2
P3	4	3
P4	4	1
P5	5	3

Draw a Gantt Chart and find out average waiting-time and average turn-around time for

- i) FCFS ii) SJF iii) RR
- b) What is Process? Explain Process States in detail. [6]

Q5) a) Implement the producer-Consumer problem using monitor and discuss how the critical section requirements are fulfilled. [8]

- b) Explain the following terms: [10]
 - i) Mutual Exclusion
 - ii) Semaphore
 - iii) Deadlock
 - iv) Deadlock detection
 - v) Message Passing

OR

- Q6) a) Write a semaphore solution for readers-writers problem.** [8]
- b) Explain the concept of Context Switching with neat diagram. [5]
 - c) Explain the principles of Deadlock [5]

SECTION - II

~~Q7) a) Explain with help of a neat diagram the buddy system memory management.~~ [8]

- b) Discuss with examples placement algorithms in fixed partitioning. [8]

OR

- Q8) a)** For the Given reference string, determine the number of page faults for FIFO, Optimal & LRU page Replacement Policies with 3 page frame available in memory. [12]

Reference String : 2 4 1 2 3 2 4 5 6 2 8 7 2 6

- b)** What are the benefits of virtual memory? Any four. [4]
- Q9) a)** With the help of neat diagram discuss file allocation methods. [12]
- b)** Explain any 4 types of file organization methods. [6]

OR

- Q10)a)** For the give sequence of disk request, determine the total distance traveled of disk head in satisfying the entire request for FCFS, C-SCAN, and SSTF algorithms. Initial head position is 120 and total number of cylinders in the disk is 200. Assume head in moving in the direction of decreasing track number. [12]

20 165 40 190 10 60 140 105 180

- b)** Write short note on IO Buffering [6]
- Q11)a)** How security is implemented in Windows 2000. [8]
- b)** Explain how access matrix can be implemented effectively [8]

OR

- Q12)a)** Describe different approaches on Intrusion detection. [8]
- b)** Describe different methods of user authentication. [8]
